iOS DEVELOPER AND TEAM LEAD

Gears of Leo AB (LeoVegas)

JOAO ROBERTO DE GODOY SAMPAIO

Apr 2021, iOS Developer

I worked together with Miguel in two different occasions: when we were part of the Native Apps Development Team in Betsson and later as part of the Native Labs Team in LeoVegas.

When I first met Miguel at Betsson he was a great Android developer with an excellent JS development background. I saw him as a tech-savvy high skilled person that could take care of the whole tech stack in a project, handling both frontend and backend tech discussions and development.

Later, during our work together at LeoVegas, he did an amazing job on setting up and maintaining our project's repositories and CI-CD pipelines, handling different framework integrations from third parties with external companies into our code, and had the skillset to bring all his JS coding knowledge to become one of the best iOS/Swift developers that I know, always focusing on good code quality and adhering to the SOLID coding principles. Also, since he was hired mainly as a Team Lead, he was very proactive to avoid blockers for the rest of the team.

Aside all of this, Miguel is a good colleague that turned to be a great friend of mine and I'm very glad to have shared all these working years together.

SHIFEI CHEN

Nov 2016, Developer

I would recommend Miguel to any future position since he is one of the top developers I know. I have had the opportunity to work with him during his time at LeoVegas.

Miguel has extensive knowledge and rich experience in software development. But these "hard" skills aren't the only reason why he would be an asset to your team. He is also a true team lead that guides the development work on the right track as well as inspires every team member to reach his/her potential; a humble learner that keeps evolving himself and chases for betterness; and a great friend who you'd enjoy to talk after working hours

I would love to work with Miguel again in the future. Please take my highest recommendation and you would definitely have an amazing journey together.

MOBILE TECH LEAD & AUTOMATION ENGINEER

Betsson Technologies AB

BEN BULTMAN

Nov 2016, Developer

Miguel is perhaps the most effective developer I've worked with. His energy and enthusiasm are contagious -- inspiring people around him to improve themselves. His experience shines through his work and attitude to problem solving. He has a fantastic ability to find solutions to problems in complex environments. I give Miguel my strong recommendation because of his ability to deliver enormous value.

DENIS LEAL

Nov 2016, iOS Developer

I worked with Miguel at Betsson for almost a year. During this time, I saw Miguel work as Android Developer, Scrum Master, Mobile Dev Ops and Technical Lead. Miguel is a high skilled professional, a fast learner who can easily move around different technologies and projects while delivering results with excellence. Moreover, Miguel has attitude within a team and is a great player that brings value to the company when it comes to culture and atmosphere. I totally recommend Miguel to anyone who is looking for an outstanding IT professional.

SEVIL GÜLER

Nov 2016, Android Developer / Scrum Master

I'm very pleased to recommend Miguel for any position that he is interested. As a fellow at Betsson, I've worked alongside Miguel for the past 10 months.

Miguel is one of the amazingly inspiring team-mate who is always ready to help and inspire everyone with new technologies and with his new ideas to improve team works. His eager to learn and practice new things worth seeing. His skills and tech qualities make him an invaluable addition to any team.

Furthermore, at all times I have found him to be reliable, hard-working, honest, peace-loving, respectful to be as helpful. I can confirm that he is a man of great integrity, is extremely dedicated

to his work. Opposite of many people he is a full stack developer with many valuable knowledge of programming languages and tools.

Miguel has my highest recommendation and I wish we can work with him again one day. Don't hesitate to trust him and believe in his amazing potential.

ANDROID DEVELOPER

Betsson Technologies AB

MATTIAS OHLSSON

Nov 2016, Agile Coach

Miguel is a humble star in a development team. He is so all-round and has the right eye and feeling of how you should do development. Miguel is highly technically skilled with long experience and is a fast learner of new things/technologies/practices. His creativeness is so impressive that you constantly get surprised of what he delivers both in code and in areas of new ideas and improvements.

It is fun to have Miguel in your team since. He creates a good atmosphere with his positive attitude and always has easy for smiling and laughing. He cares about everyone in the team.

I want to work more with Miguel in future because of his way of doing development, his skills, his creativeness and he is so fun to be around. A little candle that lights up your day!

ALEXANDER SKVORTSOV

Oct 2016, Android Developer

Beside the real professionalism and rich set of skills, Miguel is always ready to help his team-mates with thoughtful suggestion or explanation. I know this guy as "King of tools", he is always having something more for developers in order to be more efficient or productive.

FULL STACK DEVELOPER & ARCHITECT

Digital Labs AB

JOHAN HJERLING

Oct 2012, Manager

Miguel is a very bright, fast and creative developer and also a very kind and loyal person. What he doesn't know, he happily studies and learns. As a manager, you quickly realize he has been doing this a long time before he started his professional career in computer science. Coding and solving problems is not just a job to Miguel. Over the years in Digital Labs I've followed his development in programming, client contact and managing development teams. If Miguel is not on your team, I'd recommend you find a way to make it so.
